

National Threshers Association Plans For 2021 Reunion

Wauseon, OH – The National Threshers Association (NTA) will host its 2021 reunion, June 24-27, at the Fulton County Fairgrounds north of Wauseon, OH. The event will feature equipment from Reeves and Allis Chalmers, along with side shaft gas engines.

Each year, the NTA show typically showcases about 50 steam engines, in addition to hundreds of tractors and gas engines. Daily demonstrations include threshing, sawmill, shingle mill, veneer mill, plowing and machinery parades with covered grandstand seating for spectators. Sunday has limited activities, which include sawing and threshing.

Other highlights include antique tractor and steam engine pulling displays, operator skills contests, evening spark shows, prony brake horsepower testing, Baker fans, a steam-driven dynamo and much more. Air-powered engine displays are also featured, along with photos and memorabilia exhibits dating back to the reunion's first show.

Official National Threshers Association shirts are available under the grandstand at the fairgrounds, as well as other commemorative items. An extensive flea market features tractor and steam engine parts, authentic and reproduction manuals, antique and new tools, collectibles, signs, decals and a wide variety of other items.

One-day admission is \$5, and annual membership (good for admission on all days) is \$20. Children 12 and under are free with an adult admission.

For more information, including on-site camping details, visit <http://www.NationalThreshers.com>.
